## **THE DETAILS:**

All of the odds on a roulette table are based on the “law of averages” The casino can only gain money from the player (being you) playing the table. Until..... NOW!!!!

We have taken the “law of averages” and turned it into your advantage. Maybe the casino might catch on one day, but there are millions of people playing online casinos and only a small number of people who use this system.

It is 100% legal to use any strategy you wish as long as you don't have any illegal software. And this strategy is your mind and a pen and paper... Thus being perfectly legit!

All casinos' have an “Acceptable loss”, which means they can lose a lot of money before changing any gaming rules!

I have played at many online casinos and learned their systems inside and out. This system works best at this tested and deliverable casino. I seriously recommend that you only play at this one casino!

For information on other casino software and programs, email me and I will provide you with ONE OTHER. This one is by far the best!

Email me at [Questions@easyfreeincome.com](mailto:Questions@easyfreeincome.com)

This is a very trusted casino and will not cause your computer harm in any way. The money making software size is not large either, so do not worry about space.

After installation is done, the casino will open for you and sign in form will appear.

## **GET READY FOR EASY MONEY!**

After you click open my account, the casino will confirm your user name and password. They even send a copy to your email, for future reference.

The software is stored wherever you saved it, next time you reopen it , it will prompt you with the sign in form.

**YOU'RE HALF WAY TO A BIG HUGE SMILE!  
AND BIG HUGE BANK ACCOUNT!**

At sign in you can pick either play for fun or for real money! I would recommend going for the “real money play” since you cannot lose! Either way, make sure you go to **European roulette!** It only has one 0 so it's easier.

On the casino lobby screen:

run your mouse over **Specialty GAMES** on the left side. A list will drop down, go to **European Roulette!**

OK now you're registered and signed in and you know where the game is. The only thing left is to deposit money to become a "real money player."

I recommend you deposit \$400 to get the largest bonus! since the casino has a bonus match of 100% up to \$400 free, so that means if you deposit \$400 they will also give you \$400 for a bank roll of \$800, hence the reason you do not have to bet any of your own money! And you got the most out of the bonus!

To Deposit go to "CASHIER" from the main lobby page:

This book tells you how to get your bonus at the end of the and deposit money, later on after I explain the system!

This is one of the reasons this casino is so good, the bonus money is also directly deposited into your account, no waiting like other casinos!

If you can't afford \$400, at least deposit \$150, which will still give you another \$150 for free, for a total of \$300. For this system to work you need a bank roll of at least \$300 to start.

Casinos favor players with “sitting money” and I truly believe I have done better because of that fact. So if you deposit the \$400 you get a maximum bonus of another \$400 and you have ton's of sitting money. With this system you do not HAVE TO lose a single penny of your money! Also in case you make a mistake and lose your bonus you will still have your initial deposit to keep going. You have nothing to make but money from there onwards, its 100% safe. Please leave some sitting money to guarantee your results. (sitting money can also be not cashing out all your winnings, you need \$300 minumum and the rest is sitting money)

I will explain further how to deposit money into your casino account after I explain how the system works!

# ***THE SYSTEM***

The Key To Your Success

This system is based on betting in a sequence, with the numbers I have analyzed and prepared for you. They have been tried and tested many times and are the best set of numbers for your advantage. Please do not ever change these numbers without emailing me for advice!

The system you will be using is based on these betting terms: **HIGH/MIDDLE/LOW**

You will be betting on one of these fields **H/M/L** with a slight increase in the stake, until it comes up.

Keep reading...trust me it works!

You will be placing bets with winnings of 2:1, so that means if you bet \$1 you get \$3, with a profit of \$2 because the original \$1 was yours.

Bet \$5...make **\$10**

Bet \$10...make **\$20** and so on.....

By the “law of averages” these fields have a 1 in 3 chance of winning, and with my system you only need 1 in 19 spins, which has given you **160%** chance of winning and have given yourself an unbeatable advantage!

That’s right, you have more than quadrupled your chance of winning! (And I always do)

Defeat the “law of averages”!!

There is a HELP menu in the roulette game to help you understand how to play.

### Understanding How To Bet:

You will have 3 fields to watch for and bet on.

These are called “Dozen Bets”

1. This is a bet on LOW with the numbers 1-12 .  
It looks like this: 1<sup>ST</sup> 12 (see the \$1 chip on the board!)

You win if the ball falls on one of these numbers.

2. This is a bet on MIDDLE with the numbers 13-24. And  
looks like this: 2<sup>ND</sup> 12 (see the \$1 chip on the board!)

You win if the ball falls on one of these numbers.

3. This is a bet on HIGH with the numbers 25-36. And looks like this: 3<sup>rd</sup> 12 (see the \$1 chip on the board!)

You win if the ball falls on one of these numbers.

Note: the side board of numbers that are in a big loop, above the normal board (called orphans) have nothing to do with any of this, so just ignore them.

Follow these directions exactly and you will increase your bank account by \$1 to \$3 in the **beginner** part of this system and \$4 to \$20 in the **advanced** part of this system, with every win you have, regardless of how many losing ones. The number sequence is perfectly calculated so that it always adds more money for each spin, to make up for the loss of the previous spin, plus some so you always win!

OK now grab a blank piece of paper and a pen. I use a book of blank lined paper, so I can keep using it until its full.

(Ok so you have to bet to spin the wheel, so to avoid losing any money, you are going to place a \$1 bet on RED and a one \$1 bet on BLACK, like this!

This way, we know either red or black will win, so it balances out and you don't lose or win, while your spinning to find your sequence and watching the wheel!

You are just betting on red and black and spinning the wheel and watching and recording what drops into the wheel. You are looking to record whether the ball drops in HIGH (H), MIDDLE (M), or LOW (L).

Bet only how I tell you to, never bet at random!

Start recording on a piece of paper what comes up... looking for a consecutive run of 7 spins where a certain field does not come up, of either, H, M, or L. (Remember you are betting \$1 on red and black while you do this, so that you can spin the wheel without losing money!.) Just keep clicking "REPEAT" and it will repeat your bets on red and black for you.

For example, these numbers fall in:

34, 33, 20, 18, 12, 25, 6, 15, 13, 22, 9, 4, 3

Your notes on a piece of paper will look like this:

H, H, M, M, L, H, L, M, M, M, L, L, L

As you can see, there is a consecutive run of 7 spins and the HIGH (H) field has not come up. Its time to start betting!

Once a field either H M or L does not come up for 7 spins, and its time to start betting on your feild, you can stop betting \$1 on red and black, because you are now betting on your field and you can spin the wheel as long as you are betting. Just clear your bet's and start betting on spin 8.

If you understand that, skip the next paragraph!

Further example:

If you count backwards from the last letter in that run (row of letters) you will count 7 letters, all being either L OR M, but yet there is no H. So when this happens you need to start betting from the chart of numbers. But until this sequence happens you only are betting on red and black.

You only bet on one of these three fields if it has not come up for 7 spins, and then you continue betting on it until it does. Remember if you have any questions email me at [Questions@easyfreeincome.com](mailto:Questions@easyfreeincome.com) and I will help you with any questions, Or read the commonly asked question e-book!

Proceed:

Spin #	Bet This Much	You Make
8.	\$1	\$2
9.	\$2	\$3
10.	\$3	\$3
11.	\$4	\$2
12.	\$6	\$2
13.	\$9	\$2
14.	\$13	\$1
15.	\$20	\$2
16.	\$30	\$2
17.	\$45	\$2
18.	\$67	\$1
19.	\$100	\$0

A HIGH (H) number hasn't come up for 7 spins, so now you proceed to bet on that field (H) until it does come up. And then you win! It's that simple. You break the "law of averages" into pieces.

This table is the number sequence you will be betting with. Remember, start betting on the 8<sup>th</sup> spin, after 7 spins have been rolled and one of the three fields have not fallen in (appeared) H, M, or L.

This table tells you how much to bet and on what spin to bet it on! It starts with spin 8....

**Remember, this is just the beginner stage of the system.**

**In the advance stage, you make 15x the money!**

**Try this stage first to get the hang of it.**

Continue recording what numbers fall in the wheel, you can continue on the same table after you have won.

Once you have won and your field comes up one any one of the spins 8-19 , STOP and start betting on just red and black again and wait for another consecutive run of 7 spins without a certain field H,M, L showing up...

Remember the only way you can lose is if the field you're betting on doesn't come up for 19 consecutive spins, and to make it clear, you have broken the "law of averages" and gained a 160% advantage! That means you will win 160% of the time, I don't see where you could go wrong! Just make sure to follow my directions exactly and always ask for help if needed [Questions@easyfreeincome.com](mailto:Questions@easyfreeincome.com)

Before we proceed to the *ADVANCED STAGE* of the system, I would like to tell you how to deposit money, receive the bonus and a few tips about the casino!

In case you didn't already, make sure to download the casino!

[Click Here For Automatic Download!](#)

[Click Here To Download From the Site!](#)

(be sure you get the correct software to work with this system! By clicking one of the blue area's.. us the Instant Play area on the site if you are on a MAC computer)

1. Register and create account as shown earlier.
2. Login with user name and password (If you are not already logged in)
3. Deposit: money and be matched at 100%

Try and make a \$400 deposit which will get you the best bonus of \$400 extra! For a total of \$800

To get your **BONUS** you must enter the bonus code and deposit money simply click **“CASHIER” FROM THE LOBBY PAGE**. (If you are already in the game, just click **“back”** at the top of the game page and it will take you to lobby. Cashier is on the bottom left!

You can also get to the cashier directly from the game at the top on the table, it will say **“cashier”** and will take you to the same spot.

It will take you to the deposit screen and you want to redeem coupon, on the top tab bar, to get the bonus:

Now to get your bonus you want to enter the bonus code:

A screenshot of a mobile app interface with a green background. It is divided into two sections. The top section is titled 'FIRST DEPOSIT' and contains the text 'On your 1st deposit, receive a:' followed by '100% match bonus worth up to \$400' in large yellow font and 'Coupon Code: 400FREE' in smaller yellow font. The bottom section is titled 'SECOND DEPOSIT' and contains the text 'On your 2nd deposit, receive a:' followed by '100% match bonus worth up to \$488' in large yellow font and 'Coupon Code: 488FREE' in smaller yellow font. At the very bottom, there is a small white text box with the text: 'Redeem Coupon Codes "400FREE" and "488FREE" in the "Redeem Coupon" section of the cashier after making your 1st and 2nd deposits, but before making any wagers to take advantage of this amazing offer!'

If it's your first deposit then the bonus code is: [400FREE](#)  
Then it will tell you that once you deposit you will be matched 100% up to \$400.

Click on "MAKE A DEPOSIT" bar:

It will walk you through the deposit process..

Once you make your deposit this way, you will **automatically get your bonus** added to your account in a few minutes!

This casino has 24/hour help, live chat or phone support.

I recommend using your credit card, as it is fastest and easiest. They have many forms of payment though. Click-to-pay, bank transfer, credit card, check, RCcash, ecocard, e-wallet etc.... (If you are from the USA read the ATTENTION USA: at the bottom of this book, for details on credit cards!)

As soon as you make a deposit it takes about 2 minutes to go through and then they automatically give you your bonus and you're ready to play with 100% more than the amount that you put in!

One excellent thing about this casino is, they do not charge you anything to cash out. Most casinos will charge you almost \$30 to cash out or make you cash out only when you have reached a minimum balance. This casino has great staff and very player (customer) friendly rules!

## My Rules:

- Don't get Greedy... Stick to the numbers I gave you.
- Set a limit for yourself. I chose \$400 a day/
- Review your numbers if you ever get confused, review the numbers on the display right of your window on the roulette screen.
- Always play European roulette, you increase your advantage because it only has one 0.
- Make sure you only bet \$1 on red and black, that the only way you can spin the wheel without losing any money!
- Stick to the rules and turn your \$100's into \$1000's, enjoy kick back and make money!
- Email me if you have a question [Questions@easyfreeincome.com](mailto:Questions@easyfreeincome.com)

# ADVANCED SYSTEM

This is where you make the big \$\$\$

You need a balance of at least \$300 to play the beginner system and a casino bank balance of at least \$600 to play the advanced system.

You can use the beginner system to gain the money to play the advanced system, or you can go straight to the advanced by depositing the remainder to be able to play the advanced system.

Here you will be playing the same way, but with a new set of numbers (with higher return) and another way of recording your sequences and doubling your chances of success.

## REMEMBER THIS

Your Advanced system is based on a certain field not coming up for 9 consecutive spins, meaning you bet on the 10<sup>th</sup> spin.

This is your **ADVANCED** table

Bet in this sequence to make \$4 to \$20 a win

Spin #	Bet This Much	You Make
10.	\$10	\$20
11.	\$14	\$18
12.	\$18	\$12
13.	\$27	\$12
14.	\$41	\$13
15.	\$61	\$12
16.	\$90	\$9
17.	\$135	\$9
18.	\$200	\$4

Do the same thing you were doing before, only bet on red and black until you spin 9 consecutive spins without a field H,M,L coming up. Place a bet on the 10<sup>th</sup> roll.

Then stop at a win and start over, same as before!

This is how to win **\$100 an hour** and make **\$400 a day** by playing by these rules.

Who do you know that makes \$100+ an hour and doesn't have to leave home? Well now you know someone..... **YOU!**

OK now I have one more awesome way for you to actually double your chances of winning and double your odds of a field not coming up for the amount of consecutive spins that you need before betting.

This is called "Column Betting"... your first system was based on "Dozen betting"

So in addition to your “Dozen Betting” You will add “Column Betting”. To double your chances, and not have to sit around and wait so long for one of your sequences to appear.

This is how “Column Betting” is done:

You will now also be watching for 1<sup>st</sup>, 2<sup>nd</sup>, 3<sup>rd</sup>, to have a consecutive run without one of the columns (fields) appearing. Whether it be 1<sup>st</sup>, 2<sup>nd</sup> or 3<sup>rd</sup>.

Use the same piece of paper you’re using for H,M,L and either draw a line down the page vertically, or split the page in half horizontally. You will be keeping track of two different runs now.

They show 2 to 1 on them, because that’s the win.... Remember bet \$10 make \$20, even though your return will be \$30, but the original \$10 was already yours, so you pocket \$20

This is a bet on 1<sup>st</sup>: Still 12 numbers 34,31,28,25,22,19,16,13,10,7,4,1

This is a bet on 2<sup>nd</sup>: 12 numbers 35,32,29,26,23,20,17,14,11,8,5,2

This is a bet on 3<sup>rd</sup>: 12 numbers 36,33,30,27,24,21,18,15,12,9,6,3

Just follow all the same direction for H,M,L and it will work the same way for 1,2,3.

So if you roll:

34, 36, 20, 18, 3, 7, 24, 30, 31, 16, 1, 24

Your 1,2,3 record section of your paper would look like this:

1,3,2,3,3,1,3,3,1,1,1,3

Notice the number 2 hasn't come up in 9 spins, you can now place a bet using the advanced table system of this guide.

Use this picture for reference to help you understand better. You can see where the numbers are placed. Either in 1,2,3.

Just to avoid confusion at this casino, I'll tell you how to place your bet's. The best way is to select the amount you want to bet and place it in the yellow circle, and then click the area on the table that you want to place it in.

So you select from the row of chips... how much you want to bet.

and each time you click a chip it is added to the yellow circle...

So if you want to bet \$41 for example, then you click the \$25 chip one time and the \$5 chip 3 times, and the \$1 chip one time... to equal \$41 and it will look like this:

Then you go to the area on the board were you want to place the \$41 bet and click on it , and it will place your bet.

Here is an example of a \$41 bet placed on the (M) section.

For your next bet, the same amount will still be there, just add whatever chips you need to add to the yellow circle to add up to what you want the bet to be. If you place a bet and it's the wrong amount, just hit the "clear button" before spinning and replace your bet.

You will figure out, your own way to place bet's, its really easy. But this is what I do!

### One more trick from me to you:

After you feel confident about using the prior strategies, try this: When you are betting in order of the stakes \$ in the tables that I gave you, and it takes more than 5 bets (spins) to get your win, (meaning you won from spin 14 or higher) then after your win just keep on betting on the same field, only \$5 at a time though, and most of the time make an extra \$20 from doing that on each win!

I win the sequence playing "Middle", off of spin 14 in the ADVANCED system, which the bet is \$41 and I made \$13 dollars on that sequence.

Since it took so many spins for my "Middle" to appear, it's more likely that it will appear again on the next spin.

I often do this technique, sometimes you will lose the \$5 so then you just stop and continue looking for your sequences, but often the "Middle" or whatever field I'm playing, will appear 4 or 5

times in a row after that, so I just keep on betting \$5 until I lose the spin and I start over.

The previous tip, is just a tip, something that works for me! So if you want to be very cautious, just use the systems and you will be fine!

[WANT ANOTHER CASINO??](#)

Sometimes players like to play at more than one casino to make double the money by using 2 or even 3 casinos. Also sometimes a players may not like one casino but prefer the other or maybe they even prefer the betting limits ect... at another casino. So we have researched and personally use these other 2 casinos as well and are offering them for your choice or preference.

Here are 2 other casino's that work for players in the USA and many other countries:

[Click Here to be taken to Casino Choice # 2](#)

(Highest betting limits for advanced system, quick cash outs)

[Click Here to be taken to Casino Choice Number #3](#)

(Also high betting limits for advanced system, many deposit methods)

Remember all casino's listed in this book have been tested and work the same way and the system works just as well at all of them. They just have different aspects that you may prefer like higher betting limits, different deposit methods, different design or set up. Make sure to use European roulette in any of these tried and tested casino's.

We email you from time to time if and when we add more to the list of casinos that work with the system. If you have any questions Just simply email me at [Questions@Easyfreeincome.com](mailto:Questions@Easyfreeincome.com)

### **DON'T FORGET TO DONATE:**

Remember: we don't charge for this book, but we want you to make money.... And intern when you see you are making money and you feel thankful to us, don't forget to make a "thank you" donation (in whatever amount you see fit) to our website for the free information. You can do this from the main website area. This is what keeps our site running and allows us to share this information with you!

**THANK YOU!**

**ATTENTION USA PLAYERS:** Due to new regulation in the United States, very few online casino's will allow US players to gamble online. Of course this is one of the few casinos' that still allows US players.. And that's great for us because the system works well at this casino, and it had been tested over and over again! If you are from the US and planning on using a credit card to deposit your money then you must know this:

Once in awhile a US customer's credit card will be declined because credit cards run on a selected screening process by your credit card company, and every so often they will screen a random card and decline a purchase at an online gambling institute. Do not worry though, because all you have to do is try again in an hour or two and it will go through, or you can just simply try a different credit card. The payment on your credit card will not show up on your bill as a casino or anything. It will say just a name of the company you are paying. If you have any more questions just simply email me or even talk to the live 24/hr help at the casino.
